

UNDERSTANDING THE DETAILS OF STEAM SYSTEMS

OPTIMIZE YOUR SYSTEM & ENHANCE SAVINGS

Explore the world of steam in our comprehensive hands-on seminar. Learn everything from fundamental concepts to practical applications. Discover how to optimize your system, reduce energy costs, and improve efficiency.

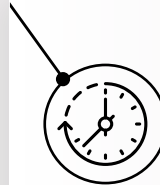

Learn the intricacies of steam systems, starting with the basics of sensible and latent heat, along with key piping details and practices to maximize efficiency. Gain an in-depth understanding of steam trap operation, testing, and troubleshooting techniques, and uncover insights into digital mixing valves and how to handle water hammer effectively.

Attendees will leave this course with a better understanding of how to identify, measure, and eliminate system energy losses.

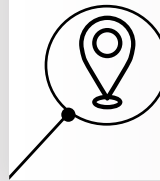

TOPICS INCLUDE:

- Basics of Steam
- Steam System Piping Best Practices
- Steam Trap Operation
- Steam Distribution Systems
- Digital Mixing Valves
- Condensate Return Solutions
- Water Hammer

EVENT INFORMATION

When: December 11, 2024
8:30 am - 3:30 pm ET
Lunch is provided

Where: JABO Supply Corporation
209 Braley Road
Huntington, WV 25705

 **REGISTRATION**

Register online: keinc.info/ss1211

Training is free to attend, but registration is required.
